ULSTEIN YACHTING

Ulstein is a leader in ship innovation. Our iconic brand has changed the world of ship design.

Ulstein develops yachts standing out from the ordinary with exceptional seakeeping qualities.

We offer stunning exterior designs, with or without our patented X-BOW®, precise deliveries, cooperation with renowned interior designers, as well as shipbuilding.

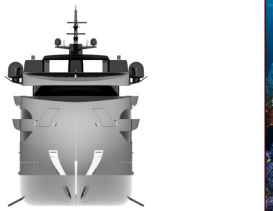

At Ulstein, we can develop your concept with your own signature looks in yachts and yacht support vessels.

For each project, we offer a wide range of designs and in-house technical, engineering and project management services. We are turning visions into reality.

GO ON EXPLORING!

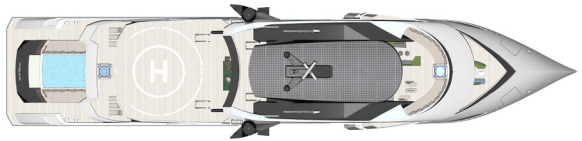

AN ULSTEIN YACHT

Yachting without boundaries
- Combining offshore tough with a luxurious touch

X-BOW®

The seakeeping characteristics of the patented X-BOW are well proven and have an impact on comfort, safety, efficiency and operability. The X-BOW fore ship shape results in a wave piercing effect and also reduces pitching and bow impact loads.

INCREASED COMFORT

The soft entry in waves improves the on-board comfort and leads to reduced noise and vibrations, and uninterrupted rest.
The soft motions in waves reduces wear-and-tear to the entire vessel and all on board.

IMMACULATE QUALITY

The increased volume in the foreship offers spacious areas for accommodation, recreation or relaxation.

Folding balconies opens up to get close to the nature and the sea.

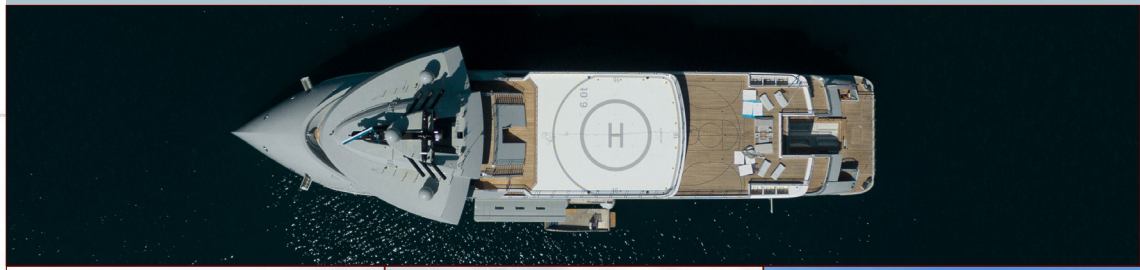

SAFETY

The shape and enclosed nature of the X-BOW miminize the risk of spray, avoiding the hazard or nuisance of slippery decks.

‘Olivia O’ - 88.5m length, 16.3m beam

WORKMANSHIP FOR 100 YEARS

We take pride in what we do, and this is acknowledged as the Ulstein quality.

We cover all parts of shipbuilding; starting with an idea, basic design, engineering, purchase, integration, construction, assembly, pre-commissioning, commissioning, testing and after-delivery follow-up services.

We know that on-time delivery is very important to our customers, and that has been at the core for the entire organisation since the start-up 100 years ago.
